Junior Software Engineer / Full-Stack Developer

Summary

Junior engineer skilled in React, Python/Flask, and MySQL with freelance delivery experience. Builds responsive UIs, secure REST APIs, and CRUD features with strong debugging and collaboration. Bilingual (Arabic/English).

Skills

Frontend: HTML, CSS, JavaScript, React (hooks), responsive & accessible UI • Backend: Flask, REST, auth (sessions/JWT), error handling • DB: MySQL (schema design), MongoDB (basics) • Tooling: Git/GitHub, VS Code, Postman, basic CI/CD • Plus: WordPress/Elementor, ACF/CPT UI, GoHighLevel, Zapier, Photoshop/Canva

Projects

Full-Stack App — React • Flask • MySQL: designed schema; built REST API with auth/CRUD and error handling; responsive React UI with reusable components and validation.

React Portfolio — dynamic sections, grid layouts; performance and accessibility focus.

Python Tic-Tac-Toe — CLI game with basic AI and modular structure.

Experience

Freelance Web & BizOps Engineer — Self-Employed | Houston, TX (2023–Present): delivered client sites/small apps; implemented automations (Zapier, GoHighLevel) for lead capture and notifications; version control and clean handoffs.

Education

University of Houston — B.S. Computer Science, Minor in Software Engineering — Expected Dec 2025 •
Houston Community College — A.S. Computer Science — 2024
